the design.

For each of our products we try to work with local manufacturers. This allows us to modify and have up to point furniture at all times and work on tailor-made projects.

Starting from the end user we thrive to create magic by offering solution-orientated products with our international team 24/7 at your beck and call.

As of January 2022, our XDesign products will be integrated in the 3D Pcon.Planner software tool. We're thrilled to assist you in designing and furnishing your project.

THE SHORT STORY OF FLEXFURN

It all started in 1997 with a company called 'Europa2000', which was founded by father and son Alex and James Verbeeck. They soon became the leading wholesaler of foldable and stackable furniture for the hospitality and events industry in Belgium. As a result of their great success, they soon pushed back boundaries by expanding their market to Europe and the rest of the world. Thanks to their world wide experience and affinity with the market as well as the latest trends, they began to create and manufacture their own products, called the XDesign collection. Creativity, sustainability, flexibility and the putting the customer first are after 25 years still our main goals.
